

## Other IPSCO Products

### Air Filtration

A comprehensive range of air filters to suit all applications

### Cooling Towers

Single Cell Forced Draft with Axial Fan

Single & Multiple Cell Forced Draft With Low Noise Centrifugal Fans

Comprehensive range of high-quality cooling towers.

From single cell forced draft through to multiple cell forced draft using axial or low noise centrifugal fans.

Replacement high efficiency pack & drift eliminators will suit many towers for upgrade or repairs.

Robust steel construction outlasts brittle fibreglass under NZ high UV conditions.

## Other World-Leading Technology

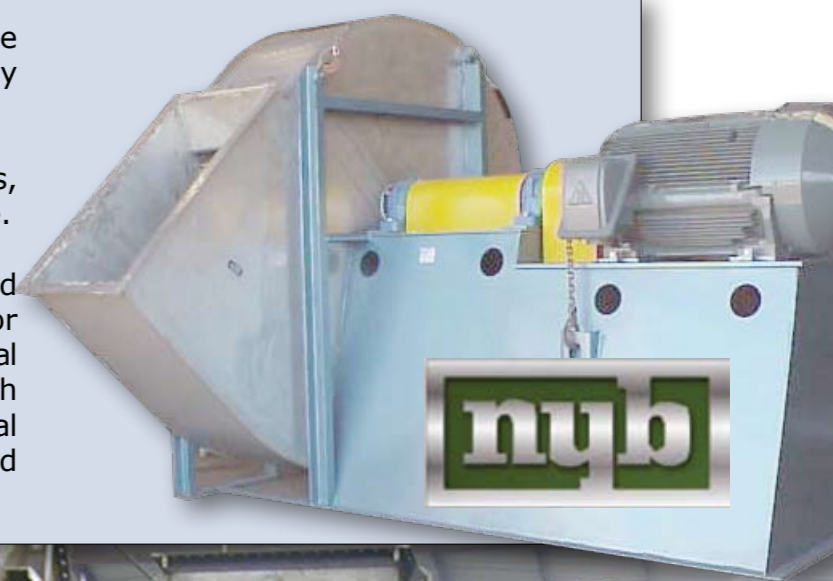

- Comprehensive range of high-quality cooling towers.
- High Quality & High Efficiency Industrial fans
- A huge range of Air filtration products for industry
- Consistent high quality fabrication.
- Gas Phase filtration for odour control
- Manufactured in New Zealand
- A full range of other world leading products and services are available from IPSCO .

## Fans for Industry

**IPSCO** provides a full range of industrial fans for almost every application.

Manufacturing fans for over 45 years, IPSCO has unprecedented experience.

From small gas boosters & packaged units through to specialised fans for major industry, IPSCO offers full technical support, computerised selection, with proven performance to International standards along with site support and service.
