

Other IPSCO Products

Air Filtration

A comprehensive range of air filters to suit all applications

Cooling Towers

Single Cell Forced Draft with Axial Fan

Single & Multiple Cell Forced Draft With Low Noise Centrifugal Fans

Comprehensive range of high-quality cooling towers.

From single cell forced draft through to multiple cell forced draft using axial or low noise centrifugal fans.

Replacement high efficiency pack & drift eliminators will suit many towers for upgrade or repairs.

Robust steel construction outlasts brittle fibreglass under NZ high UV conditions.

Other World-Leading Technology

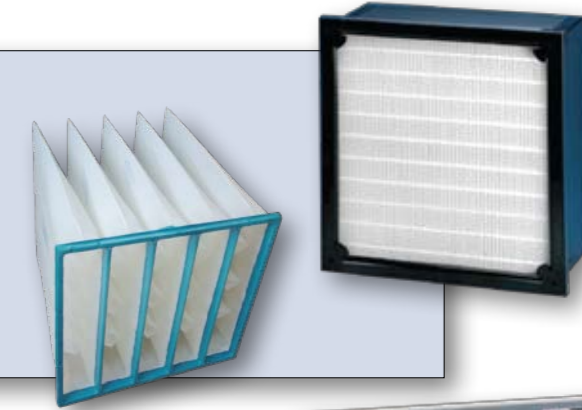

- Comprehensive range of high-quality cooling towers.
- High Quality & High Efficiency Industrial fans
- A huge range of Air filtration products for industry
- Consistent high quality fabrication.
- Gas Phase filtration for odour control
- Manufactured in New Zealand
- A full range of other world leading products and services are available from IPSCO .

Filters for Industry

IPSCO provides a full range of industrial filters for almost every application.

From flat panel filters through to pocket filters and HEPA filters we have a product suitable for all your filter needs.

IPSCO

Panel Filters

From flat panel filters to pleated panel filters and grease filters, IPSCO has a filter for your needs!

Filters from G3 - F8 are available in standard 1/1 sizes ex stock.

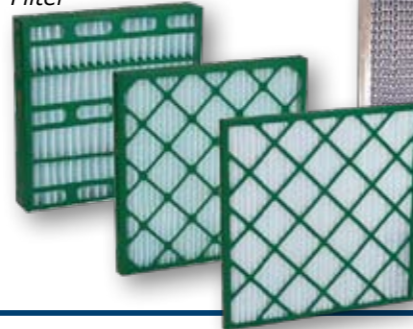

FMP Flat Panel Filter

AL50 Pleated Panel Filter

Cardboard Disposable Filter

Grease Filter

CHF Filter Frames

Compact Filters

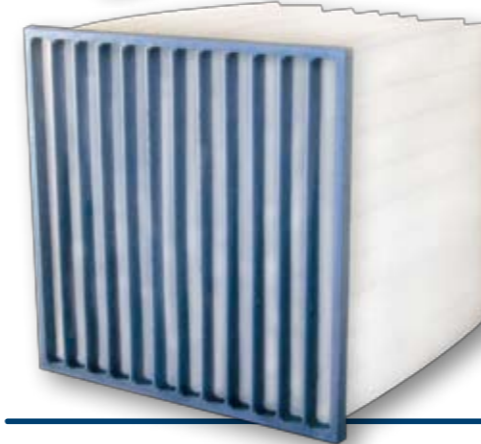

Compact pocket filters for economical low resistance and high quality air systems.

The premium range of pocket filters will substantially reduce labour and maintenance costs in most quality filter systems.

The added advantage is a considerable savings on power kW/hrs due to reduced fan power required to maintain airflows.

Compact Pocket Filter

Rigid Filters

NanoPleat Filter

Rigid MX & NanoPleat model filters provide space saving for places where filterbank area is restricted.

The benefits of high efficiency & high dust loading capacity make the rigid filters the best option for reduced running and maintenance costs with their easy replacement.

CarboPleat Filter

MX Rigid Filter

Gas Phase Filtration

PK12 MediaPak Cartridges

Tub Scrubber

First...in clean air

A-Prompt real time corrosion monitoring

OnGuard Monitoring Systems

Magnahelics & other devices

Purafil media for commercial projects excels in the removal of odours and improves indoor air quality.

For industrial projects Purafil media removes gaseous contaminants that cause decay and discolouration in museums and libraries and prevents corrosion in machinery and computers.

Purafil gas scrubbers remove odours in waste water treatment plants and prevents toxic releases of chlorine and sulphur dioxide.

Purafil monitoring systems provide 24 hour protection for vital equipment.

Deep Bed Scrubber

Purafil Side Access System

Purafil Cartridges

HEPA Filters

World leading technology with HEPA filtration, terminal units and laminar flow units for Hospital Operating Theatres where very clean sterile air is required.

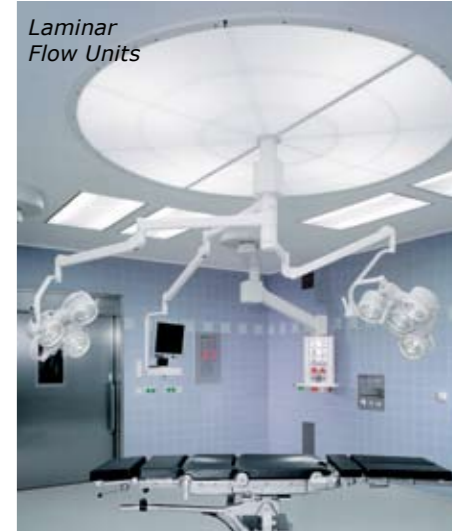

HEPA Filter

Terminal Filter Unit

Safe Change Housings

Laminar Flow Units
